More interesting info...

Education

2015 - 2017

I.E.S. Juan de la cierva

CFGS in multiplatform application development (DAM)

My latest projects

TipoTest

www.tipotest.es

TipoTest is a web application designed to help people prepare for exams, competitive examinations, and, in general, to study with an exam-based approach. TipoTest generates test type exams from any content, which makes it easier to prepare exams with specific syllabus or very specific knowledge.

Technologies: React · Next · Tailwind CSS · PostgreSQL · Supabase · Typescript · OpenAI API · Langchain

Sons of Cadia

<https://sonsofcadia.vercel.app/>

Sons of Cadia is a board game association located in Pinto, Madrid. With my help they managed to go from having a static website created with Wordpress (<https://asociaciontercioviejo.wordpress.com/>) to having a dynamic web application with a modern design and a new authentication and table reservation system (<https://sonsofcadia.vercel.app/>).

Technologies: React · Vite · Tailwind CSS · PostgreSQL · Supabase · Javascript

Technologies

The ones I use most in my daily life

Java · Spring · Java Server Faces (JSF) · Oracle · SQL · REST · JSP · HTML · Javascript · Eclipse · Maven · Git

Those I know but use only in personal projects

React · Next · Typescript · Tailwind CSS · PostgreSQL · Supabase

I would like to work with

Java · Spring · React · Angular · Typescript · Tailwind CSS · PostgreSQL · Supabase · MongoDB · Blockchain

Lenguajes

Spanish: Native

English: B2 - C1

Skills

Adaptability to change ·
Autonomy in learning ·
Continuous Learning
